

A massive whirlpool forms off the coast of Japan after the March 11, 2011 earthquake.

The Fukushima, Japan nuclear power plant explodes. It is sitting on top of one of Japan's tectonic fault lines. The Pickering B<sup>14</sup> in Ontario plant also sits on a fault line.

## **A rash of recent earthquakes have plagued the world for the past 10 years, causing tsunamis and killing hundreds of thousands. WHY?**

Sumatra, Indonesia - December 24, 2004 (Unknown Tens of Thousands)

Pakistan - October 8, 2005 (50000 casualties)

Haiti - January 12, 2010 (222000 dead)

Chile - February 27, 2010 (500 killed)

Japan - March 11, 2011 (16000 dead)<sup>1</sup>

### **THE HAARP THEORY**

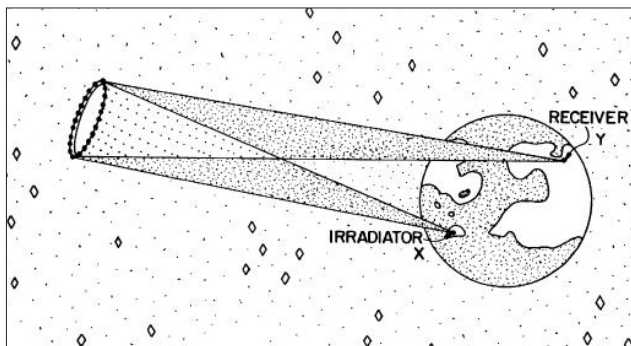

(High-Frequency Active Aurora Research Program)

This antenna array is an augmentation of frequency technology perfected by Nikola Tesla in 1897<sup>2</sup>. The technology was later purchased by the U.S. Military and developed in secret over the past 100+ years.

It emits harmonic frequencies, such as radio waves, and concentrates them into a powerful beam of energy which is directed upwards into the atmosphere<sup>3</sup>.

This energy can be used in a variety of ways, including destroying missiles, shutting down electrical grids, effecting brainwaves and heating the ionosphere [hurricanes].

When pointed at the Earth HAARP has a very different effect; one Nikola Tesla knew of back in 1897. He claimed he could 'crack the Earth in two.'

This diagram shows a power beam (U.S. Patent 5202689) hitting a reflector in space (U.S. Patents 5202689, 5041834) and redirecting to a specific location (U.S. Patent 4686605).

This boast came to fruition at some time in the 20th century. The HAARP facility can direct enough energy at any point on the Earth, vibrating at an equal frequency of the ground, to essentially shake it to pieces on a molecular level.

The applications of HAARP have been aggressively hidden, it is said to be the superweapon of the future. A Russian speaker of the house, Zhirinovsky, claims they too have a tsunami superweapon capable of planetary application.

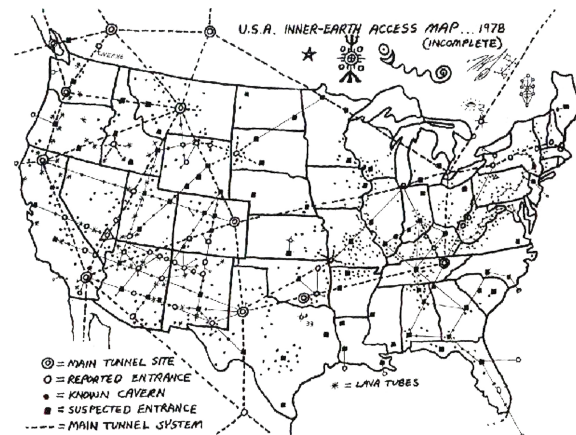

Even the UN claims<sup>4</sup> HAARP has the power to supercharge the atmosphere enough that the release of energy [lighting] would "simulate and perform the same function as performed by the detonation of a heavy type nuclear device." (U.S. Patent 4873928)

In four of the listed earthquakes, Sumatra<sup>5</sup>, Haiti, Chile<sup>6</sup> and Japan<sup>7</sup>, unusual ionosphere activity was recorded by various agencies before, after and during.

### **THE UNDERGROUND CITY THEORY** (Underground Nukes Digging Apocalypse Shelter)

The recent earthquake in Virginia, that was felt from Georgia to Toronto, has helped shed some light on the possible cause of the recent wave of earthquakes.

Virginia is no where near any faultlines<sup>8</sup>, in fact, it is at the near centre of the North American tectonic plate. It could not be the epicenter of a natural earth quake; there is the distinct possibility that the quake was a result of an underground nuclear explosion.

This diagram shows the sites of a country wide system of tunnels and underground cities planned by the U.S. government [CIA] in 1978<sup>9</sup>.

Adding to the digging theory is Ukraine's extremely strange underground sounds<sup>10</sup>, which sound nothing like normal tectonic activity<sup>11</sup>. Sounds have been heard emanating at a Tampa Bay Devil Rays game in Florida<sup>12</sup>, most likely due to a massive and swift escape of air from an underground facility<sup>13</sup>.

### **THE CELESTIAL THEORY** (The Sun, Comets and Nibiru)

An alternate, but unsubstantiated claim, is that passing comets, asteroids and the planet Nibiru, cause gravitational and electromagnetic disturbances on Earth, causing unusual atmospheric and land anomalies.

There is little evidence to support such a claim, as the mere passing of large objects is insufficient force to cause an earthquake.

For example, it is rumored that in 2003 the Soho Satellite, launched by Japan, picked up a massive asteroid moving through our solar system. It was the size of Jupiter, or 1000x Earth, yet worldwide there was not a significant number of earthquakes.

Although the sun effects the Earth in a multitude of different ways, namely temperature variances and plant growth circles, it has not been proven to cause earthquakes, but little research is available on the subject.

### **THE SECOND COMING THEORY** (Christ Returns, Vindication Reins)

In such times it is prudent to look into the deeper meaning of things. To discover, truly, what our reality is; not just some random sequence of events, but a perceivable and knowable history stemming from the vine of the anointed son. Have faith in God and pray for salvation. READ THE BIBLE!
